SHIPBUILDING – ENGINEERING - CONSTRUCTION INDUSTRY AND TRADE LTD. CO.

Excellence

Precision

Safety

Success and Reliability

Durability

About Us

Our company was founded by Özer AYLUÇTARHAN, who began his career in 1989 at Turkey Shipbuilding Industry Inc. in Pendik Shipyard with his own company. He worked as a partner in various departments of the shipyard for nearly 10 years, contributing to its operations.

After 1999, he established our company, which specializes in industrial facilities and shipbuilding. We provide services in the shipyards in the following areas: Steel construction, Shipbuilding manufacturing and assembly, Tank and Silo production, Pipe manufacturing and assembly, and Insulation.

With its experienced and specialized team, our company has rapidly developed and continues to serve as a solution partner for major companies in Turkey.

Mission, Vision ve Strategic Goals

Mission

To add value to our business partners by completing projects with high-quality standards and on time, utilizing our expert team and technological infrastructure.

Vision

To become one of the leading engineering and manufacturing firms in Turkey and the world by providing innovative, reliable, and quality-focused solutions in the industrial facilities and shipbuilding sectors.

Strategic Goals

- **1. Quality and Efficiency:** To ensure compliance with international standards in production and assembly processes and to work with a focus on continuous improvement.
- **Innovation and Technology Utilization:** To leverage advanced technologies to differentiate in the sector and enhance competitiveness.
- **Customer Satisfaction:** To deliver tailored solutions to meet the needs of our business partners and foster long-term collaborations.
- **Qualified Workforce:** To support the continuous development of our expert team through training, ensuring both individual and corporate growth.
- **Sustainability:** To protect resources through environmentally friendly practices and act with a sense of social responsibility.
- **Globalization:** To participate in international projects and establish a global brand presence.

Production Profile

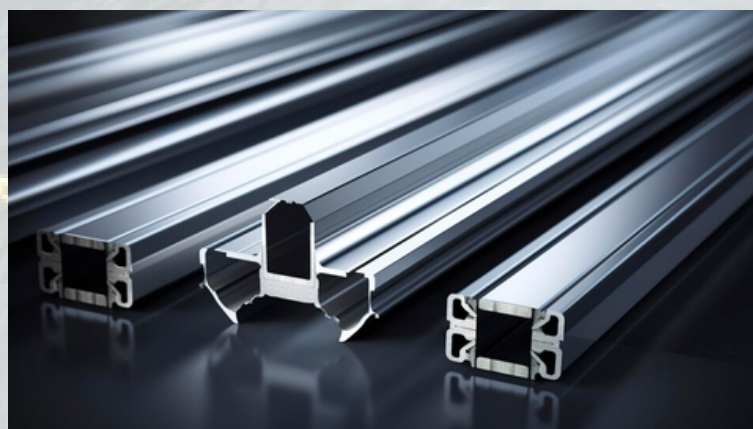

Our company, specialized in the industrial facilities and shipbuilding sectors, offers a wide range of services as a manufacturing firm. Our production and assembly processes aim to stand out in the industry by providing tailored solutions to meet customer needs.

Our areas of expertise include steel construction manufacturing, shipbuilding manufacturing and assembly, tank and silo production, pipe manufacturing and installation, and insulation applications.

In steel construction, we manufacture platforms, ramps, bridges, roofs, and scaffolding systems required for industrial facilities and ships to the highest quality standards. In the shipbuilding sector, we carry out all types of structural manufacturing and equipment installations for ship hulls.

Additionally, we provide industrial solutions for storing liquid and solid materials through tank and silo manufacturing. In pipe production and installation, we design and assemble pipeline systems suitable for water, fuel, gas, and chemical transportation lines.

Experience

Our company specializes in the shipbuilding industry, with extensive experience in the manufacturing and outfitting of various types of vessels, including tugboats, tankers, fishing boats, and container ships. We excel in the following areas:

- Equipment manufacturing and outfitting
- Pipe manufacturing and outfitting
- Steel pre-production
- Block manufacturing
- Erection works

This expertise allows us to deliver high-quality services and products that meet the demands of our industry.

In the Media L 400

Present in Only 12 Countries

As Seil Mühendislik, we have successfully completed the outfitting and manufacturing processes of multi-purpose amphibious assault ships, which are found in only 12 countries worldwide. We take great pride in being a partner in this domestic project, where 131 Turkish companies participated.

These ships are regarded as one of the cornerstones of modern defense technology, incorporating some of the most advanced and complex systems in the industry.

Thanks to our high-precision engineering solutions, innovative production techniques, and meticulous attention to detail, our company has earned the privilege of contributing to such a prestigious and large-scale project. This achievement is not only a testament to our technical expertise but also to our commitment to teamwork, time management, and quality assurance.

Through this project, Seil Mühendislik proudly contributes to Turkey's global influence in the defense industry, establishing itself as a recognized name on the international stage.

The Strength of Steel: Expertise in Tugboat Manufacturing

As Seçil Mühendislik, we have demonstrated our strong presence in the industry through the production of steel hulls, steel outfitting, and assembly works under Uzmar Shipyard. Tugboats, one of the most critical elements of maritime transportation, require durability, reliability, and engineering excellence.

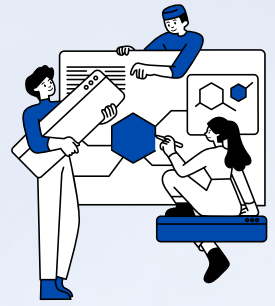

With this understanding, we have left our mark on tugboat projects with steel structures manufactured to superior quality standards and meticulously executed assembly processes. Our modern designs and advanced engineering approaches have guided us in constructing tugboats that adapt to the challenging conditions of the seas and deliver long-lasting performance.

Training and Production

At our company, the training programs required to enhance our employees' competencies and perfect our production processes are meticulously planned. Our employees receive regular training in occupational health and safety, technical skills, and quality control within their respective fields.

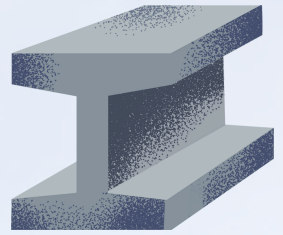

These training sessions ensure that we achieve the highest standards at every stage of our projects and enhance efficiency in our operations. The expertise of our teams and the solidarity within our company enable us to deliver work of exceptional quality and reliability, making us one of the leading firms in the industry.

Steel Construction Work

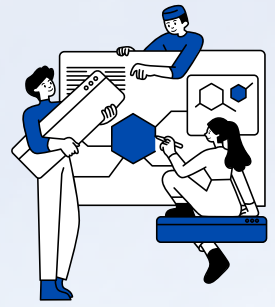

We specialize in steel construction services for various structures, including:

- Factory and warehouse buildings
- Aircraft hangars
- Truck garages
- Terminal buildings
- Parking lot canopies
- Gas station shelters

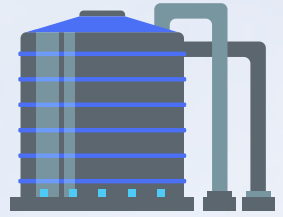

Our expertise ensures high-quality craftsmanship tailored to the specific needs of each project.

Visuals From Our Projects

Tank Manufacturing

We specialize in the manufacturing and installation of various types of tanks, including:

- Compressed air tanks
- Liquid oil tanks
- Stainless steel storage tanks
- Fuel-oil tanks

Our work ensures high-quality production and reliable assembly for a wide range of industrial applications.

Product Transport Vehicles Manufacturing and Maintenance Department

Manufacturing of vehicles with desired specifications for transporting products produced in the facility, and maintenance of existing vehicles.

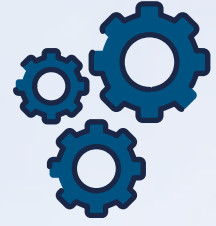

Ventilation and Insulation Department

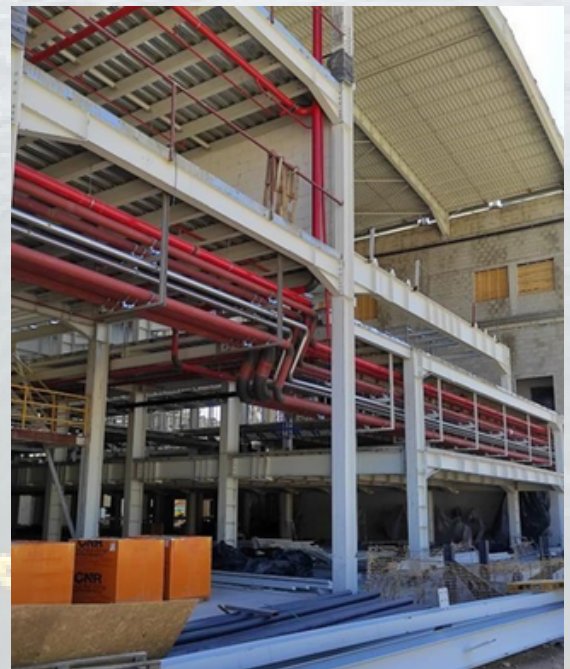

- Pipe circuit insulation
- Fire insulation
- Heat insulation
- Ventilation duct manufacturing
- Chimney jetcap manufacturing, etc

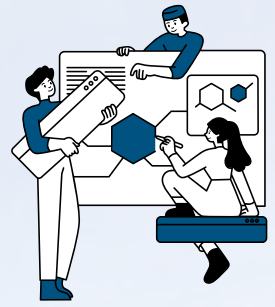

Machinery and Equipment Manufacturing and Assembly Department

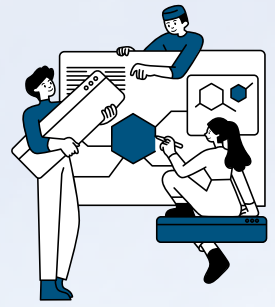

- Conveyor walkway platform manufacturing and assembly
- HVAC fan and panel installation
- RF oven installation
- TFB unit installation
- Cooling tower installation
- Compressor installation, etc.

Letter of Recommendation

It is my pleasure and honor to recommend **Mr. A.Vahap CEVIK** for the role of **SECIL GEMI MUHENDISLIK INŞAAT TURIZM SAN Ve TIC.LTD.STI.** (Secil Ship Engineering Construction Tourism Industry and Trade Limited Company) Site Manager. I have worked with **Mr. A.Vahap CEVIK** during the construction project of **BESLER GLASSFIBER FACTORY, Incesu / Kayseri / TURKEY** with 8 AC system Units as he was site manager and he was responsible of all equipment installation of the AC Systems from Aug 2020 to Nov 2020. each AC 250,000 m³/h air capacity include 4 fans ,2 stage filter, 4 cooling coil, 4 heating coil and washer water spray system.

As a Site Manager of **SECIL GEMI MUHENDISLIK INŞAAT TURIZM SAN Ve TIC.LTD.STI.**, **Mr. A.Vahap CEVIK** constantly demonstrated an extensive knowledge of project management tools and techniques, as well as superb communication skills. In particular, his in-depth knowledge of mechanical engineering skills helped increase the amount of projects completed on-time. Moreover, his uncanny ability to facilitate clear communication between different teams and departments ensured misunderstandings were few and far between.

What's more, **Mr. A.Vahap CEVIK's** extraordinary focus and strategic way of thinking always made him a stand-out team leader. Whenever there are problems or flaws in the construction Process, he showcases his superb analytical qualities to quickly identify the issue and deal with it before it can become too serious.

Mr. A.Vahap CEVIK has my highest recommendation for this position. I have no doubt he will make a strong addition to your team. Please feel free to contact me if you have any questions regarding his candidacy or past work.

The result was excellent and we thanks to **Mr. Vahap CEVIK** for his professional approach and pleasant collaboration.

非常感谢 Mr. Vahap CEVIK 先生的专业方法和愉快的合作,期待再次合作!!!
